Cannabis Catalyst Test 2

Case Study: NUGTGR-01-G11
Start date: 5/15/21
End date: 9/10/21
Elapsed time: 115 days
Grow type: Outdoor
Stages: Vegetative & Flower
Test plants: 28
Control plants: 28
Strain: [Afghan Kush](#)
Grower: CA-NUGTGR-012
Batch #: NUGTGR 01-G10-7689
Matrix: Flower
App. Method RootMAX-Drip irrigation GroMAX-Sprayer

Comments: The test included a 56-plant total outdoor grow consisting of (28) control plants and (28) test plants. RootMAX was applied 3ml per plant per day and was mixed into the water & nutrients~3 oz./day. GroMAX was applied to the top and bottom of the leaf and stalk at a rate of 4mL per plant~4 oz. total, twice weekly. Both applications were applied during the 115-day test

Results:

CONTROL	TEST	GAIN
28 plants	28 Plants	\$16,600
47.5 lbs.	55.8 lbs.	8.3 lbs.

Date Completed: 9/15/21

LOQ=Limit of Quantitation: The reported result is based on the total weight of test plants vs. control plants; after cutting, drying, and trimming. Unless otherwise stated, all quality control samples were measured, weighed, and performed within specifications confirmed by Nano Grow Max, Inc.; the values reported relate only to the test and control plants. This case study shall not be reproduced except in total, with the written approval of Nano Grow Max, Inc.
